PROFILE

GIS Analyst at Plan4Better with contributions to 16 municipal and regional projects. I combine spatial analysis, PostGIS data processing and cartography with development of practical PyQGIS tools. RWTH Aachen M.Sc., completed in July 2026.

EXPERIENCE

- GIS Analyst (working student) • Plan4Better, Munich

04/2024 – present

 - Independently developed QGIS plugins for database-backed map styles and shared layout/basemap imports. Employer reference confirms internal adoption and faster, more consistent map production.
 - Prepared and quality-checked authoritative and OSM geodata using PostgreSQL/PostGIS, Python and GDAL; wrote spatial SQL for municipal analysis.
 - Used GOAT for accessibility and mobility analysis, including isochrones, catchments and population coverage.
 - Co-authored the Augsburg accessibility/walkability study and public-transport addendum, and the Hassels and Reisholz mobility report for Düsseldorf.
- Geoinformatics Intern • Plan4Better, Munich

01/2024 – 03/2024
- Sales Associate / Cashier • ALDI Süd, Aachen

08/2023 – 12/2023
- Operations Associate / Shift Lead (part-time) • Flink, Aachen

08/2021 – 08/2023

QGIS DEVELOPMENT

- Styling: retrieve QML from PostgreSQL, filter by geometry type and apply it to QGIS vector layers.
- Layouts: parse QGIS project archives and XML, import multiple print layouts and add basemaps.
- Export: render selected layouts as 300 dpi PNG files and embed description and author metadata with Pillow.

[Workflow and plugin interface in my portfolio](#)

MASTER'S THESIS · RWTH AACHEN

- Compared retail accessibility in five cities and four transport modes across 35,555 routable 100 m grid cells.
- Computed 21 travel-time matrices with r5py/R5, OSM networks and AVV GTFS; prepared and joined Census data in PostGIS, with further processing in Python.
- Analysed Spearman correlations and produced bivariate QGIS maps, explicitly handling missing data. Thesis grade: 1.3 (German scale).

EDUCATION

M.Sc. Transport Engineering and Mobility	11/2020 – 07/2026
RWTH Aachen University · Completed · Overall grade 2.3 (German scale)	
B.Tech. Production Engineering	03/2015 – 04/2019
National Institute of Technology Calicut, India	

FURTHER PROJECT CONTRIBUTIONS

- Amberg: walking catchments from parking facilities, POI/population coverage; contribution to the “Höchste Eisenbahn” cycle-route project.
- Schleswig-Holstein: contributed to fixed-route and on-demand public-transport assessment. Altrip: georeferenced historical aerial images to derive building-age classes.

SKILLS

GIS & cartography: QGIS, PyQGIS, GOAT, spatial analysis, georeferencing
Data & code: PostgreSQL/PostGIS, SQL, Python, GeoPandas, Shapely, GDAL/OGR, Qt, Git
Routing & statistics: r5py/R5, GTFS, OpenStreetMap, SciPy, Quarto

SELECTED COURSES

PyQGIS Masterclass; Python Foundation for Spatial Analysis; Advanced QGIS; Mastering GDAL Tools.

LANGUAGES

German B1 (course stage B1.2), working toward B2; English fluent; Malayalam native; Hindi and Tamil.
